

## CropLife Foundation Presents at IFPRI

On April 15, CropLife Foundation consultant, Leonard Gianessi, presented his Talk on the Importance of Pesticides for Feeding the World at a Brown Bag Luncheon seminar for staff at the International Food Policy Research Institute (IFPRI) at their Washington, DC offices. Leonard was accompanied by CLI's Tracy Gerstle, who is coordinating a CLI-sponsored IFPRI study modeling the potential worldwide yield impacts from adoption of crop protection technology (herbicides, insecticides, fungicides) in wheat, maize and rice. Leonard is supplying the data needed by the IFPRI modeling team. Leonard and Tracy visited with one of the Study's principal researchers, Nicola Cenacchi.
